TELETRONICS TECHNOLOGY CORPORATION

DTU-2000-1 Datasheet

Data Transfer Unit for Removable Memory Cartridges

Applications

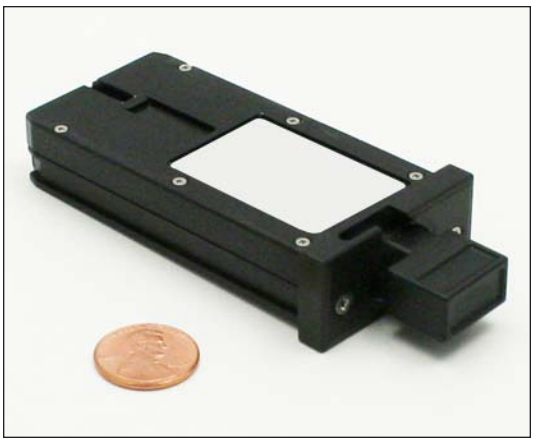

- Ground support
- Recorded data transfer

Features

- Allows data transfer from the ADSR-4003 on an on-demand basis
- Downloads data from removable memory cartridges and transmits through a USB port
- Compatible with USB 2.0 and USB 3.0
- Bench-top unit
- Accepts any DTD-XXXX data cartridge
- USB 3.0 high-speed data download
- Universal 9 Volt AC to DC power adapter included
- Powered by AC to DC adapter or USB port (if capable)
- Front panel LED indicates power on

Description

The DTU-2000 data transfer unit is a low-cost desktop unit used to download data from removable DTD-XXXX memory cartridges used in the ADSR-4003 Advanced Data Server and Recorder. Data recorded using the ADSR-4003 downloads to a local PC or server using the USB interface port on the DTU-2000 and the files on the DTD-XXXX are available to the Windows® operating system.

DTD-XXXX-1 Memory Cartridge

DEKRA Certification — DEKRA certified — Accredited by ANAB

Management System AS9100C ISO 9001:2008
