

Sorensen™

HPX Series

High Power Extensible Programmable DC Series

36 kW - 240 kW | 10 - 1000V | 45 - 6000A

Configurable High Power Solution

The Sorensen HPX High Power Extensible, Programmable DC Series from 36kW ~ 240kW+, delivers unsurpassed quality & reliable low-noise performance, fast and precise programmability with premium features at an affordable price, all in a convenient rack-mount cabinet with casters.

The Flexibility You Want with the Capability You Need in One System

The HPX Series features two modes in one: Automatic constant voltage and constant current mode crossover with protection against hazardous faults. Remote Shutdown (S/D) Interlock provides various external output shutdown capability in case hazardous faults occur. Other features such as External Analog Programming provide increased control and convenience for external programming applications achieved through various external

voltage control methods. The HPX also includes Remote Sense for correcting errors from line voltage drops. Sophisticated power conversion technology, with State-of-the-art FET-based high frequency switching technology provides accuracy, exceptional load transient response & low noise in a smaller footprint as compared to other technologies.

Advantages:

- High power configured the way you want for today's testing and beyond
- Affordable system power with all the precision of expensive, custom solutions
- Serving every major market and application with demanding test specifications

Advanced Features:

- High Power Density: Up to 150kW in a single bay rack-mount cabinet
- Up to 240kW in a dual bay rack
- Fast Load Transient Response: Protection from undesired voltage excursions
- Fast Slew Rate with exceptional rise/fall times for speed-critical applications
- Low Ripple: Suitable for the most sensitive applications
- Low Audible Noise: Temperature controlled variable speed fans
- High accuracy: Voltage/current measurements without external DMMs
- Modular architecture simplifies sparing and maintenance

Sorensen™ HPX Series: Product Specifications & Details

1. Power factor correction will be standard (included) on all high power systems.
2. Slaves are SGe with isolated analog control units with shaft locks option as standard.

Markets & Applications:

- Telecommunications & IT
- Industrial Automation & Process Control
- Magnets, RF Amplifiers & Beam Steering
- Heater Supplies
- Battery, Ultracapacitor & Energy Storage Testing
- Material Research
- Electroplating, Sputtering & Coating
- Electrical Component Validation
- Burn-in & Lights-out Testing
- Laser Diode Validation & Testing
- PV Inverter, Fuel Cell & Renewable Energy R&D
- Aerospace & Satellite Testing
- Test & Measurement
- Water Treatment & Purification
- Semiconductor Processing
- Industrial Automation
- Gas, Chemical, Petroleum & Utility Plants
- EOL Test, QC and Inspection
- Defense, Military & Aerospace ATE
- Automotive Component, ECU & HIL Testing
- Compliance Testing

Avionics Test

Power Simulation

ATE Applications

Manufacturing

Frequency Conversion

IEC Standards Testing
