

# Mako G

G-223

- Ultra-compact design
- IEEE 1588 PTP
- Power over Ethernet
- Trigger over Ethernet

# GigE Vision camera, CMOSIS/ams CMV2000 CMOS sensor, 49.5 fps

Mako G-223 is a 2.2 megapixel GigE machine vision camera that incorporates the high quality Type 2/3 (12.7 mm diagonal) CMOSIS/ams CMV2000 CMOS sensor. At full resolution, this camera runs 49.5 frames per second. With a smaller region of interest, higher frame rates are possible.

Mako G cameras have the same ultra-compact form factor and the same mounting positions as many analog cameras. All models include Power over Ethernet, three opto-isolated outputs, and a 64 MB image buffer. The image quality profits from the precisely aligned sensor. By default monochrome models ship with no optical filter and color models ship with a Type Hoya C-5000 IR cut filter.

#### Benefits and features:

- Monochrome (G-223B) and color (G-223C) models
- GigE Vision interface with Power over Ethernet
- Screw mount RJ45 Ethernet connector for secure operation in industrial environments
- Supports cable lengths up to 100 meters (CAT-6 recommended)
- Comprehensive I/O functionality for simplified system integration
- Trigger over Ethernet Action Commands allow for a single cable solution to reduce system cost
- IEEE 1588 Precision Time Protocol allows for easy synchronization of multiple cameras and devices on network
- Popular C-Mount lens mount
- Easy camera mounting via standard M3 threads on top and bottom of housing or optional tripod adapter
- Easy software integration with Allied Vision's <u>Vimba Suite</u> and compatibility to the most popular <u>third</u> party image-processing libraries.
- Defect pixel masking feature with the Defect Mask Loader tool that allows you to manage a user defined defective pixel list to match your application and optimize the life cycle of the camera.

• Select between B 270 ASG protection glass and filter types: Jenofilt 217 IR cut filter, Hoya C-5000 IR cut filter, RG715 IR pass filter, or RG830 IR pass filter

See the <u>Modular Concept</u> for lens mount and optical filter options. See the <u>Customization and OEM Solutions</u> webpage for additional options.

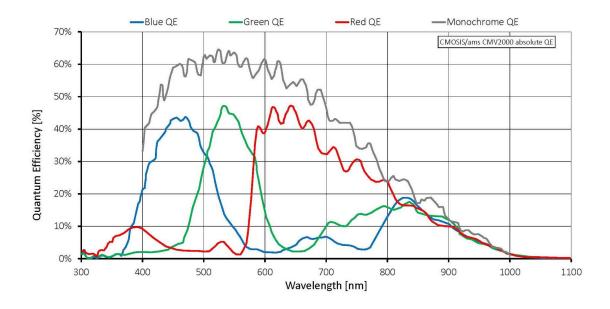

## Specifications

Mako G	G-223
Interface	IEEE 802.3 1000BASE-T, IEEE 802.3af (PoE)
Resolution	2048 (H) × 1088 (V)
Sensor	CMOSIS/ams CMV2000
Sensor type	CMOS
Shutter mode	Global shutter
Sensor size	Type 2/3
Pixel size	5.5 μm × 5.5 μm
Lens mounts (available)	C-Mount, CS-Mount, S-Mount
Max. frame rate at full resolution	49.5 fps
ADC	12 Bit
Image buffer (RAM)	64 MByte
Imaging p	performance
	Measurements are typical values for monochrome

Mako G	G-223
Power consumption	2.4 W at 12 VDC; 2.8 W PoE
Mass	80 g (with C-Mount)
Body dimensions (L × W × H in mm)	60.5 × 29.2 × 29.2 (including connectors)
Regulations	CE: 2014/30/EU (EMC), 2011/65/EU, including amendment 2015/863/EU (RoHS); FCC Class B; CAN ICES-003

## Quantum efficiency

### Features

#### Image optimization features:

- Auto gain (manual gain control: 0 to 26 dB; 1 dB increments)
- Auto exposure (manual exposure control: 30 μs to 153 s; 1 μs increments)
- Auto white balance (G-223C only)
- Color correction, hue, saturation (G-223C only)
- Defect pixel masking (user defined with Defect Mask Loader tool)
- · Gamma correction
- One look-up table
- Piecewise Linear HDR mode
- Region of interest, separate region for auto features

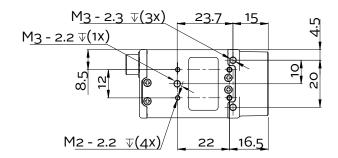

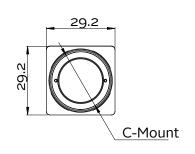

#### Camera control features:

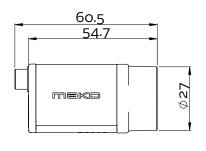

- Event channel
- Image chunk data
- IEEE 1588 Precision Time Protocol
- Storable user sets
- StreamBytesPerSecond (bandwidth control)
- Stream hold
- Sync out modes: Trigger ready, input, exposing, readout, imaging, strobe, GPO
- Temperature monitoring (main board only)
- Trigger over Ethernet Action Commands

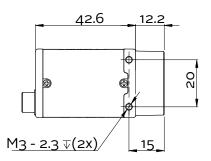

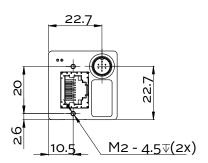

## Technical drawing

## **Applications**

Mako G-223 is ideal for a wide range of applications including:

- Robotics
- Quality control
- Inspection, surveillance
- Industrial imaging
- Machine vision
- Logistics
